

CA Live API Creator Enables Point-and-Click API Creation from SaaS, NoSQL, and Big Data

CA Live API Creator is a low-code solution to create APIs and microservices, offering businesses and developers greater speed and agility. It enables users to create APIs, integrate data across diverse data sources, and implement security and business rules at the finest level of encapsulation— all by pointing and clicking. It also enables customization of the created APIs and services via server-side JavaScript and access to a full Java® stack.

The CA Live API Creator platform yields APIs and services that are secure, reduce development time and costs, and require minimal maintenance .

“CA Live API Creator customers develop sophisticated applications and microservices with diverse data connectivity requirements. CData Drivers greatly simplify the requirement of supporting a broad spectrum of databases and integration use cases CA Live API Creator enables.”

— Renu Motwani, Sr. Director, Product Management, CA Technologies

CA Technologies

CA Technologies (NASDAQ: CA) creates software that fuels transformation for companies and enables them to seize the opportunities of the application economy. From planning and development to management and security, CA is working with companies worldwide to change the way we live, transact, and communicate — across mobile, private and public cloud, distributed, and mainframe environments.

Challenge

CA Live API Creator accelerates and simplifies the creation, execution, and monitoring of database-oriented APIs. Extending API Creator with wide-spectrum data connectivity to all of the applications and databases that their customer's request would be time-consuming and expensive.

Solution

CA Technologies partnered with CData Software to rapidly add support for new connectivity to Live API Creator. Drivers plug-in and seamlessly extend access to enterprise data sources.

Benefits

The standard interfaces of the CData Drivers make it easy to connect CA Live API Creator with new data sources. CA Live API Creator users can seamlessly integrate with and across RDBMS, NoSQL and SaaS data sources.

Results

CA Technologies was able to extend their enterprise data connectivity with minimal investment. Their customers benefit from broad data connectivity coverage to easily deliver new data APIs and create the next generation of connected systems.
